

Tree and Shrub Care

Add beauty and value to your property. Protect your trees and shrubs and enhance their natural beauty and your landscape investment with our Shrub and Ornamental Tree Care Services.

Dormant Oil Spray

This safe, effective spray is the best way to control overwintering insects in your landscape. Apply March or early April.

Soil Injection

Systemic season-long insect control for white birch, hemlocks and hollies. The controls are injected into the soil, absorbed by the root system, and carried throughout the plants. Apply in early Spring.

Disease Control

Controls disease that affect certain trees and shrubs in the landscape. Optimum disease control is achieved when the fungicide is applied in a regularly scheduled preventive program. Start early Spring.

Insect & Mite Control

A foliar spray controls the pests that can injure the trees and shrubs in your landscape. Applications can be made from late Spring through early Fall. Number of applications depends on the pest problems and the individual plants that are to Bee-protected.

Fertilizer

Give your plants the nourishment and micro-nutrients needed for the upcoming growing season. Healthy plants are then able to resist disease and insects... and are vibrant and colorful. Apply product starting in mid- to late Spring.

Deep Root Feeding

Fertilizer is injected directly into the root zone of the deciduous trees and evergreens. This improves plant vigor by encouraging a healthier root system. Applications can be made early Spring or late Fall.

Flower Bed Vitality

Let Bee-Lawn do the dirty work for you

Weed Control

A safe and effective way to eliminate unwanted weeds from germinating in your landscape beds. Early Spring is the best time to start this service, with repeated applications throughout the Summer.

Mulching Service

Enhance the beauty of your landscape with a fresh layer of mulch. This helps retain soil moisture, reduces weeds, and makes your flowerbeds look **Bee-utiful!!**

Shrubbery Trimming

Maintain the natural form of your plants and enhance the manicured appearance of your shrubs. Trim anytime from mid-July until frost.

Fall Clean-up

Remove leaves from flower bed and lawn. Leaf clean-up can minimize insect infestation and lawn disease. We also make your property look Bee-utiful!
